

24 Inch Transmission Pipeline Project

Taylorsville-Bennion Improvement District has hired Newman Construction to install a new 24 Inch waterline beginning at the intersection of Quailstone Drive and 2200 West then continuing south along 2200 West and then west on 5400 South to the intersection of 5400 South and 2700 West. This project will provide additional water capacity for our growing community. Because it is a new transmission pipeline, water services to individual homes and businesses should not be disrupted during construction. Access in and out of driveways will be maintained, although there may be a short period of delay when crews will be installing pipe in front of each driveway. Newman Construction is expected to start construction the week of April 4th and be completed by the beginning of August.

Please contact Courtney at Newman Construction with any questions about the project.
