

Coats Estates Waterline Replacement

Taylorsville-Bennion Improvement District has hired RDJ Construction to replace the waterline in the neighborhood of Coats Estates Phase 1 and 2. Construction crews will be installing a new 8-inch PVC culinary waterline and fire hydrants. The existing 6-inch and 8-inch ductile iron pipes have surpassed their design expectancy and need replacement. New service laterals running to the meter box will also be installed. Access in and out of your driveways will be maintained, although there may be a short period of delay when crews will be installing pipe in front of your driveway. Contractor is expected to start construction mid-June and be completed by mid-August.
