

2021 Redwood Road Improvements Project

Taylorsville-Bennion Improvement District has hired RDJ Construction to do some sewer and water improvement work in Redwood Road from approximately 6020 South to 6500 South. UDOT has a project next year and has asked that the District complete our improvements ahead of their project. The project will consist of tying water services and fire lines on the west side of the road to a newer waterline on the east side to allow the old waterline to be abandoned. Disruption to your service should be minimal and notice will be provided when tie-ins will be made. There are also two pieces of sewer line that will be upsized for flow conditions. This will require by-pass pumping of the existing sewer. Due to the traffic in Redwood Road, most of the work will be done at night. Work will start on September 12th and it is anticipated will be completed by the end of November. Should you have questions, please feel free to contact our office: 801-968-9081.
